

# Microsoft ADC Cybersecurity Skilling Program

## Week 3 Assignment

**Student Name:** Vincent Onchieku Collins

**Student ID:** ADC-CSS02-25052

### Introduction

This week I worked through the third section of the SC-900 Learning Path: Microsoft Security, Compliance, and Identity Fundamentals. The focus was on understanding Microsoft's compliance, data protection, privacy, and auditing capabilities, especially as implemented within Microsoft Purview. It consisted of 5 modules:

1. Describe Microsoft's Service Trust portal and privacy capabilities
2. Describe the compliance management capabilities in Microsoft Purview
3. Describe information protection, data lifecycle management, and data governance capabilities in Microsoft Purview
4. Describe the insider risk capabilities in Microsoft Purview
5. Describe the eDiscovery and Audit capabilities in Microsoft Purview

Each module equipped me with practical insights into Microsoft's modern security solutions and their role in protecting cloud resources.

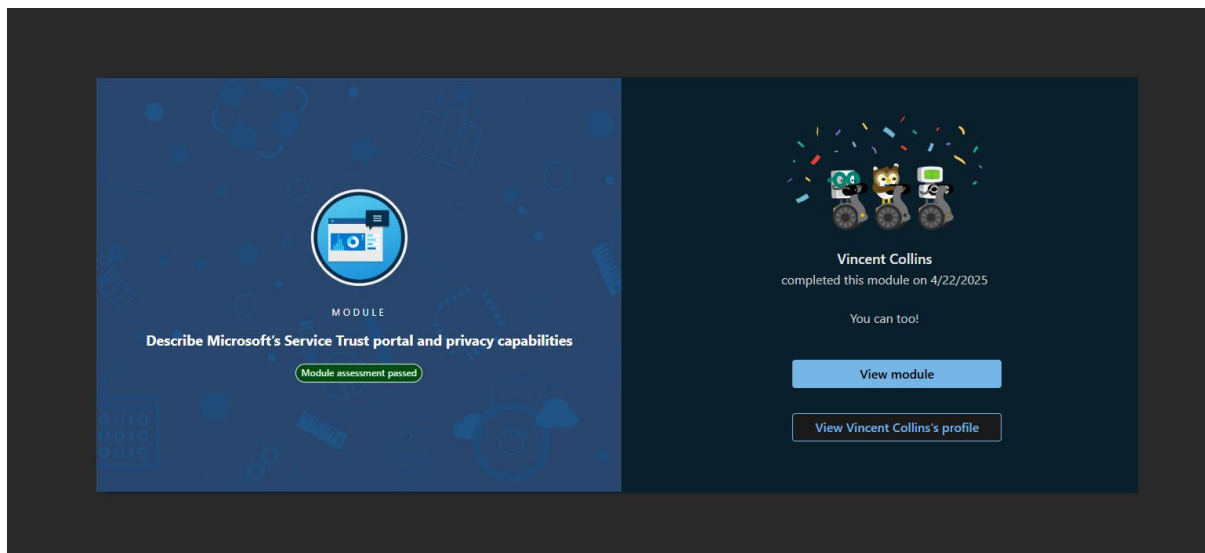

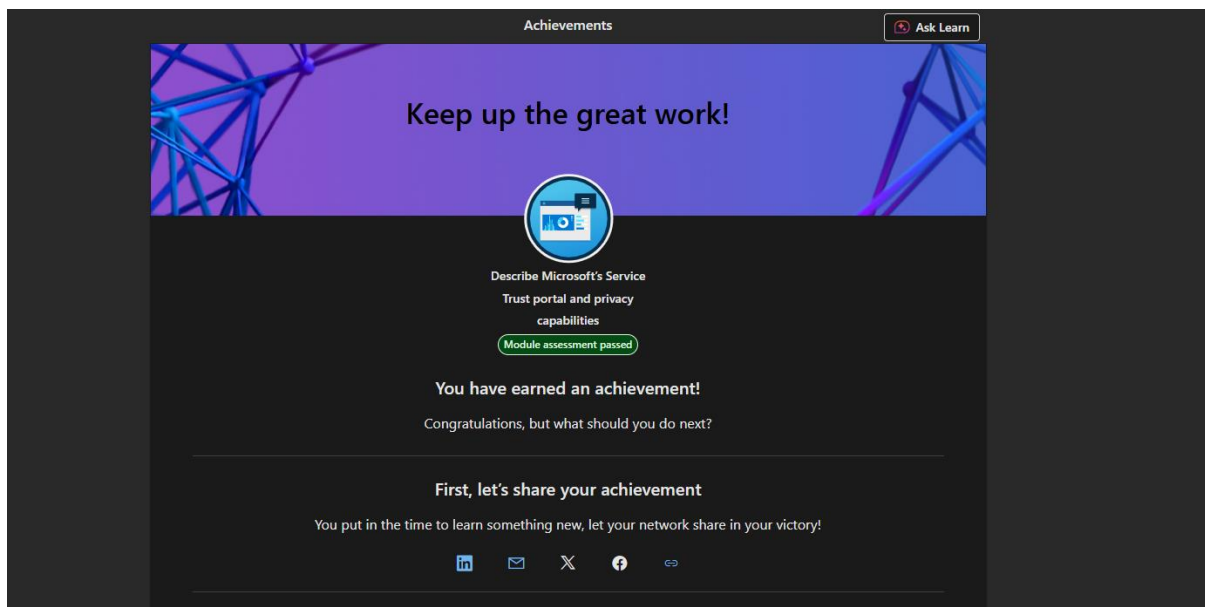

### Tasks Completed

#### 1. Describe Microsoft's Service Trust portal and privacy capabilities

In this module, I explored Microsoft's approach to transparency and trust. I learned about the Service Trust Portal (STP) and how it provides documentation for security, compliance, and privacy, as well as tools for customers to manage compliance requirements. Key takeaways included privacy principles, Microsoft's commitment to GDPR, and how users can manage Data Subject Requests (DSRs).

I completed the module assessment and passed as shown below. I shared my achievement on LinkedIn and started building my visibility.

## 2. Describe the compliance management capabilities in Microsoft Purview

This module focused on how Microsoft Purview Compliance Manager helps organizations assess and manage compliance risks. I learned how organizations can use compliance scores, manage improvement actions, and stay updated with regulatory requirements. The dashboard-based interface of Compliance Manager stood out as a helpful tool for real-time monitoring.

I completed the module assessment and passed as shown below. I shared my achievement on LinkedIn and started building my visibility.

### 3. Describe information protection, data lifecycle management, and data governance capabilities in Microsoft Purview

This module taught me how to classify and protect sensitive information using sensitivity labels, and how to manage content using retention labels and policies. I also learned about data governance strategies, including data loss prevention (DLP) and records management.

I completed the module assessment and passed as shown below. I shared my achievement on LinkedIn and started building my visibility.

#### 4. Describe the insider risk capabilities in Microsoft Purview

This module covered how Insider Risk Management helps organizations detect, investigate, and act on risky activities. I learned about use cases such as data leaks, insider threats, and compliance violations, and how policies can be configured to detect suspicious behavior across Microsoft 365 apps.

I completed the module assessment and passed as shown below. I shared my achievement on LinkedIn and started building my visibility.

**Verification link:** <https://learn.microsoft.com/en-us/users/vincentcollins-8814/achievements/3ay8e2dh>

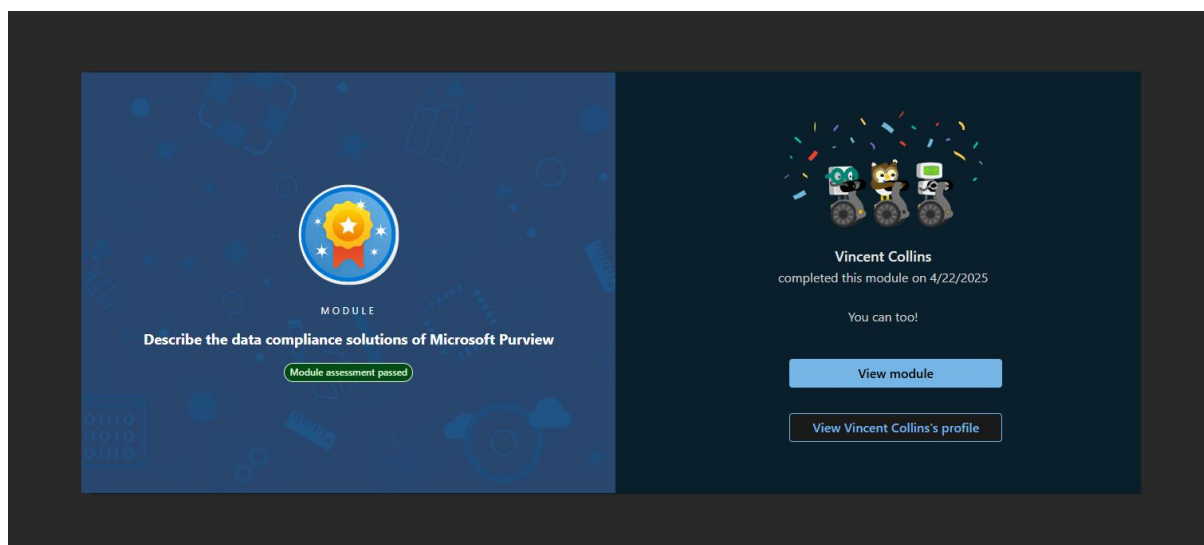

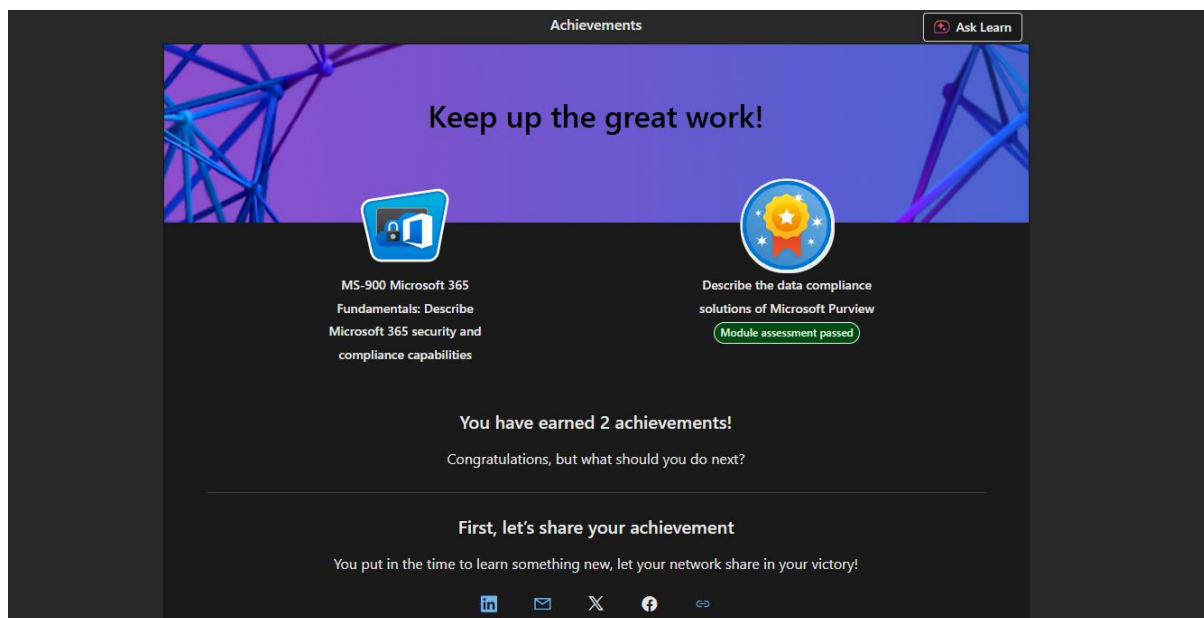

## 5. Describe the eDiscovery and Audit capabilities in Microsoft Purview

This module explained how Microsoft Purview supports legal investigations and regulatory audits through tools like eDiscovery (Standard and Premium) and Audit (Standard and Premium). I explored how data can be placed on legal hold, searched, and exported, and how audit logs can be analyzed to detect anomalous activity.

I completed the module assessment and passed as shown below. I shared my achievement on LinkedIn and started building my visibility.

## Conclusion

This week, I gained deeper insights into Microsoft's approach to privacy, compliance, risk management, and auditing through Purview and the Service Trust Portal. These modules enhanced my understanding of how enterprises use Microsoft tools to meet complex legal and regulatory requirements. I am growing more confident in my grasp of Microsoft's compliance ecosystem, and I'm excited to build on this knowledge as we move into the next part of the SC-900 path.
